Excellence in Telecommunications Infrastructure

Company Profile 2025

About Digivation

Digivation (Pty) Ltd is a strategic turnkey operations partner for major players within the Telecommunications Field Service and Infrastructure Maintenance industry in South Africa. With a proven track record of excellence and reliability, we have established ourselves as a trusted name in the telecommunications sector.

100+

Skilled Professionals

Level 1

B-BBEE Status

100%

Client Satisfaction

Our Mission

To deliver exceptional telecommunications infrastructure services through innovation, expertise, and unwavering commitment to quality, while contributing to South Africa's digital transformation and economic empowerment.

Employing in excess of 100 skilled staff members and with a well-established footprint across South Africa, we are ideally positioned for future growth and diversification. Our commitment to excellence, combined with our Level 1 B-BBEE status, makes us the preferred partner for organizations seeking reliable, compliant, and high-quality telecommunications services.

Our Vision

To be the leading provider of telecommunications infrastructure services in South Africa, recognized for operational excellence, technological leadership, and sustainable community impact.

What We Do

Site Surveys & Audits

Coverage, capacity, security and redundancy-focused surveys; troubleshooting; passive and active repair; detailed reporting for every test.

Radio Frequency (RF)

TSS & planning surveys, structural engineering and design, civils, tower rigging, upgrades, MW link installs, optimization, and preventative maintenance.

Wireless Connectivity

Network Maintenance

High-reliability point-to-point and point-to-multipoint networks; frequency-appropriate designs for Wi-Fi, cellular, and sensor networks.

Regular inspections, guy wire management, equipment maintenance, lighting & safety compliance, and security enhancements.

Cloud Services

Tailored cloud strategy, implementation, and optimization—ensuring a seamless, secure move aligned to business goals.

Internet of Things (IoT)

Building management, industrial/logistics and retail sensors; data collection, analysis, alerts and energy monitoring.

Projects We've Delivered

Preventative & Corrective Maintenance Programs

Nationwide, multi-site tower maintenance programs for mobile operators and infrastructure owners (MTN & Telkom).

RF Build & Upgrade Workstreams

Rigging, RF equipment swaps/upgrades, MW link installation and optimization across urban and rural footprints.

Connectivity & IoT Deployments

Point-to-point backhaul, sensor rollouts for conservation estates, buildings and industrial facilities with dashboards and alerting.

Ready to strengthen your network?

Reach out for a technical discovery session and a rapid maintenance assessment across your footprint.

"We carry the risk with turnkey delivery, so you can focus on outcomes."

B-BBEE Credentials

Level 1 B-BBEE Contributor

Digivation is proud to be a Level 1 B-BBEE contributor. This status provides our clients with 135% procurement recognition, demonstrating our commitment to South Africa's economic transformation and empowerment goals.

135% Procurement Recognition
